Sajid Saleem

+91 9205082478 sajidsaleem1101@gmail.com GitHub LinkedIn

Profile Summary

Computer Science student passionate about software engineering, Full-Stack Development, and Artificial Intelligence. Experienced in developing Agentic AI applications, intelligent chatbots, RESTful APIs, and scalable web solutions using Python, React, Flask, JavaScript, and modern development frameworks.

Education

Jamia Millia Islamia — New Delhi
B.Tech in Computer Engineering — CGPA: 8.3 — *2023 – 2027*

Syed Abid Hussain Sr. Sec. School, JMI — New Delhi
Senior Secondary (Class XII) — Percentage: 88% — *2021 – 2022*

Govt. Boys Sr. Sec. School, CBSE — New Delhi
Secondary (Class X) — Percentage: 80% — *2019 – 2020*

Experience

AI/ML Intern — May 2026 – July 2026
Sopra Steria — *Noida, India*

- Developing an Agentic AI chatbot using Knowledge, Policy, and Conversational agents.
- Implementing knowledge retrieval, policy enforcement, and hallucination reduction for reliable AI responses.
- Integrating backend APIs and optimizing conversational workflows for intelligent response generation.
- Debugging AI agents and supporting testing and deployment of production-ready applications.

Projects

GateGPT – Multi-Agent AI Teaching Assistant | *Python, Flask, React, LangChain, FAISS, Gemini API* | GitHub

- Built a Multi-Agent AI Teaching Assistant using Supervisor, Concept, PYQ, and Verifier agents.
- Designed a query-routing pipeline for intelligent agent orchestration and response generation.
- Implemented semantic search using FAISS, embeddings, and a verification layer for hallucination reduction.
- Developed a full-stack Flask–React application with Gemini API integration for conversational learning.

Employee Shift Management System | *MERN Stack, MongoDB, Express.js, React.js, Node.js* | GitHub

- Developed a role-based Employee Shift Management System for shift scheduling and workflow management.
- Built secure JWT-based authentication and implemented RESTful APIs with CRUD operations using MongoDB.
- Designed responsive dashboards and UI components using Tailwind CSS.
- Integrated frontend and backend modules for seamless workflow handling.

Technical Skills

Languages: Python, JavaScript, C, C++, SQL
ML / AI: Machine Learning, Deep Learning, NLP, Generative AI, RAG, Embeddings, Semantic Search, Data Preprocessing, Data Transformation, Chunking, Feature Engineering, Model Evaluation
Frameworks & Libraries: Scikit-learn, Flask, Pandas, NumPy, Matplotlib, React.js, Node.js, Express.js, Tailwind CSS
Databases & Cloud: MongoDB, MySQL, MongoDB Atlas, Cloudinary
Developer Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Colab, Hoppscotch, Netlify, Vercel

Certifications

Honours in AI/ML — Data Science Certification — Data Structures & Algorithms

Achievements & Activities

Runner-Up at **Hack Of Throne**, a National-Level Hackathon.

Solved 400+ coding questions across LeetCode and GeeksforGeeks.

Built AI-powered and full-stack applications using RAG, NLP, Flask, React.js, and MongoDB.
